cbamSuite

CBAM Reporting Platform for Sustainability Consultants and Exporters to the European Union

Nirantara
Sustaining Sustainability

CBAM Reporting Requires More Than Emissions Calculations

As the European Union's Carbon Border Adjustment Mechanism (CBAM) impacts global trade across key sectors; **iron & steel, cement, aluminium, fertilisers, hydrogen, and electricity,** exporters face strict quarterly reporting deadlines and complex embedded emissions calculations.

As a consultant, managing this information across multiple clients, their products, suppliers, and reporting periods often increase reporting effort, resources cost and reliance on error-prone spreadsheets.

Nirantara's cbamSuite is an automated software platform designed to solve exactly these operational bottlenecks.

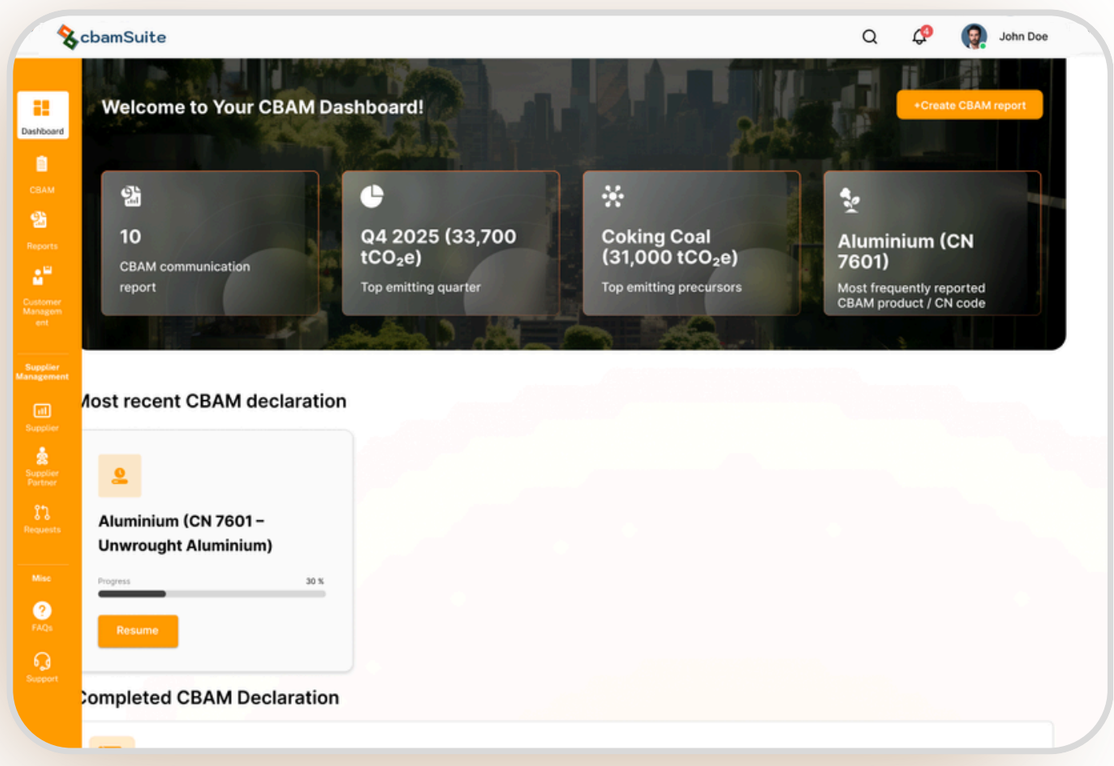

Partner with Nirantara Solutions, bundle cbamSuite into your service portfolio; transform complex, time-consuming data collection into a streamlined, automated, and audit-ready process for your clients.

cbamSuite offers you:

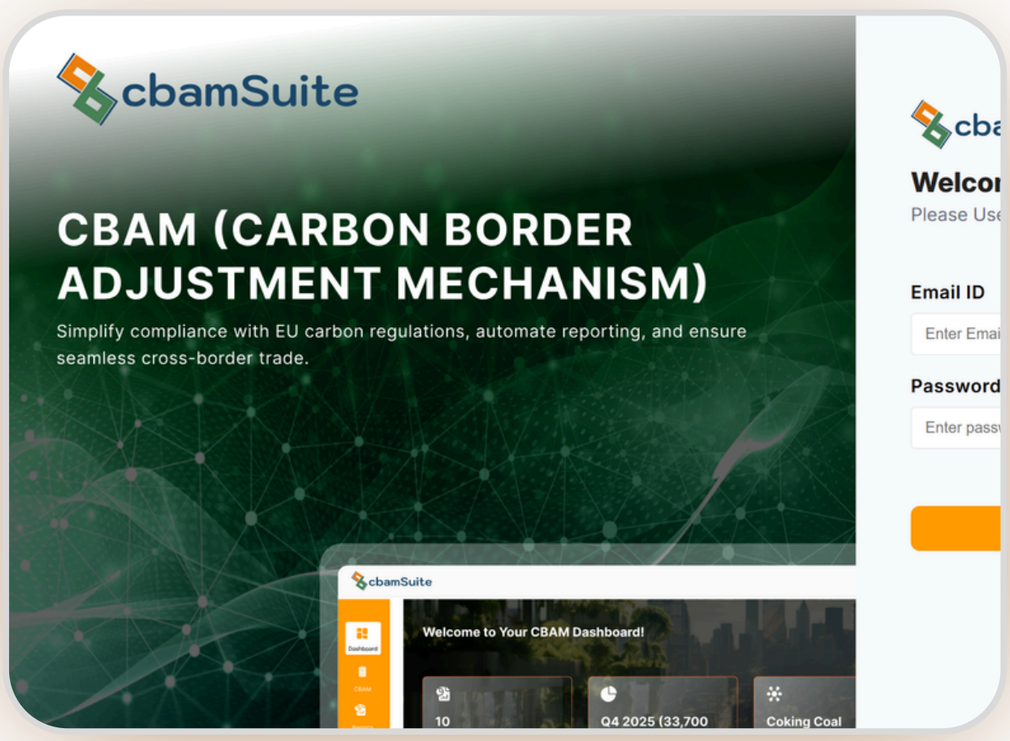

- **Operational Scale & Efficiency**
- **Enhanced Service Quality & Audit Readiness**
- **New Revenue & Client Retention**
- **Competitive Edge of Automation, error free, accurate reporting**

HOW cbamSuite Enables Savings.

- It helps to Identify emission hotspots each reporting period, enabling continuous, data-driven reduction in embedded emissions.
- Using verified emissions data, reducing reliance on default emission factors.

- cbamSuite logs each precursor by supplier and emissions figure, enabling comparison for identifying the least emissions supplier, to help make better base purchase decisions.
- Single platform to generate reports for different sectors installations/clients.

- Supports all three calculation methods - Combustion (using built-in IPCC emission factors), Process Emissions and Mass Balance (based on carbon content).

Built for Accurate CBAM Reporting
